

Year 1 Home Learning
Term 1 2018

Please see below for a grid of six different activities based around our learning this term. Your child can choose to complete some or all of the suggested activities and should bring any completed homework into school to share with the rest of the class.

In addition to this spellings (linked to phonics teaching) will be sent home every Thursday to be tested on the following Tuesday.

Reading should take place at least three times a week with a comment added to your child's reading record.

Maths

Numbers around us

Can you spot numbers in the world around us?

How many different door numbers can you see? Bus numbers? Numbers in shop windows, numbers in books, numbers on television.

Write down the different numbers you can see and where you found them. You could even draw the places you saw them if you like.

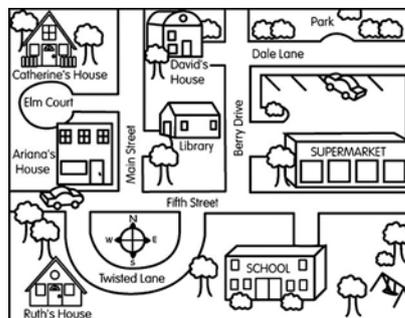

Geography

Map Skills

Draw a map of your house, your route to school, your journey to the shops or to someone else's house.

Label the key places that you know.

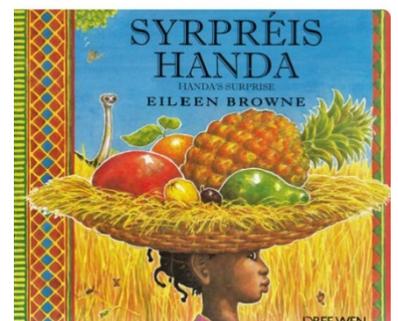

Art

Handa was very proud of her basket of fruit in Handa's Surprise.

If you could make a basket of fruit, what would you have in it?

Draw a picture of you holding a basket of fruit just like Handa. Can you label the fruits with their names?

Science

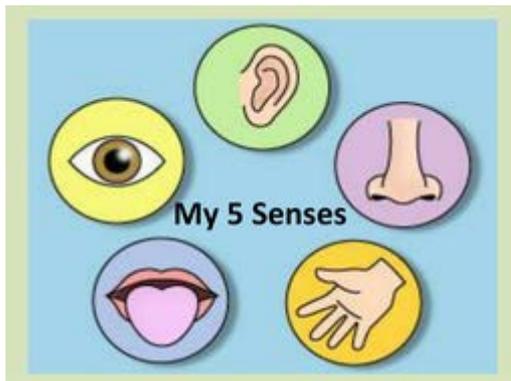

Investigate your senses at home.

How do different materials feel?

What tastes and smells do you like?

What sounds can you hear at home or on your way to school?

Make a list or draw how you used some of your senses.

Science

Seasonal Changes

Collect some Autumn leaves and make a picture out of them.

If you have paint at home, you could try some leaf printing instead.

Phonics

If you have access to the internet, play some of the phonics games on Espresso using your log in previously given to you.

Espresso>Literacy>Phonics>Phase 2/3 or Phase 3

With thanks,
Julie and Fancy.
